

John DeFalco

Web Product & Front End Engineer

Hoboken, NJ 07030 | (201) 421-0630 | john.defalco321@gmail.com | linkedin.com/in/john-s-defalco

PROFESSIONAL SUMMARY

Front-End Developer with 5+ years of experience building and maintaining responsive, production web experiences using JavaScript, React, and Node.js within Agile sprint cycles. Owns features end-to-end from design handoff through deployment, partnering with cross-functional stakeholders and contributing input on priorities and roadmap direction. Experienced implementing SEO best practices and translating Figma designs into polished, accessible interfaces.

PROFESSIONAL EXPERIENCE

Lead Front End Developer — Catalyst Brands

2025 – Present

- Own end-to-end delivery of customer-facing content for three brands — Lucky Brand, Aeropostale, and Nautica — accountable for quality, timelines, and brand consistency; drive each brand's monthly cross-functional review meetings, delivering 100% of updates on schedule.
- Contribute input on feature priorities and roadmap direction during monthly cross-brand review meetings, partnering with product and business stakeholders to align technical delivery with business goals.
- Build and maintain reusable front-end components using JavaScript, React, and Node.js-based tooling within Agile sprints, translating tickets into scalable front-end solutions and resolving issues with minimal oversight.
- Implement SEO best practices across brand websites, including semantic HTML structure, meta tag optimization, page speed and performance improvements, and mobile-first responsive design.
- Improved development throughput by 50% by redesigning the weekly mockup schedule, reducing turnaround from 4 days to 2 days; use Git-based version control (GitHub, Bitbucket) with branch-per-ticket workflows and participate in code reviews to ensure maintainability.
- Led implementation support for third-party API integrations (Monetate, Optimizely) and worked within Salesforce Einstein's existing configuration, advising cross-functional stakeholders on feasibility and optimization opportunities.

Junior Front End Developer — SPARC Group LLC

2021 – 2024

- Designed, built, and delivered custom interactive components and responsive landing pages using HTML5/CSS3 and JavaScript, leveraging jQuery and Sass/SCSS on the Salesforce B2C Commerce Cloud platform; supported high-traffic sites averaging 3,500+ daily unique visitors.
- Accelerated team delivery by supporting the team lead and adopting standard business workflows; produced content across multiple brand websites, contributed to ecommerce financial reporting for 6+ high-profile retail brands, and executed A/B testing initiatives to inform data-driven decisions.
- Served as point of contact for cross-functional partners, translating business requirements into executable front-end solutions; advised stakeholders on feasibility, usability, and site functionality.
